

## About the Thread Detail Page

On the Thread Detail page, you can navigate from post to post, adjust your view of the page, view information about the selected post, and reply to others.

- A. By hovering over the action bar, you can access functions such as Subscribe, Unsubscribe, or Search. When subscribed to a thread, you receive an email alert when a post is updated or a reply is posted. Your instructor must enable this function when creating a forum. The search field is hidden by default to save screen space.
- B. Select one or more threads and make a selection in the Message Actions drop-down list. Actions include marking threads read or unread and setting or clearing flags. Flags mark threads for later attention. You can also use the functions for collecting posts and selecting all posts.
- C. Collapse or Expand Thread: Collapses or displays the message.
