

Assigning Categories to Grade Center Columns

When creating or editing a standard column, you may select a built-in or custom Category for that column. For this tutorial, we will begin by editing a column.

1. Under Control Panel, click **Grade Center**, then **Full Grade Center**.

2. In the header for an existing column, click the contextual arrow, and select **Edit Column Information**. Otherwise, click the **Create Column** button on the action bar, and begin setting the properties of the new column.

3. Scroll down to the Category setting, and select the appropriate Category from the drop-down list.

Submit

When creating or editing a calculated column, scroll to the Select Columns section. Select the **Selected Columns and Categories** option, and the section expands to reveal the boxes in the illustration below. In the Categories to Select box, select the Category, and click the **Add** button (>) to calculate the Total, Average, Minimum, or Maximum for that Category, or to include it in a Weighted calculation.

SELECT COLUMNS

Choose **All Grade Columns** to include all grade columns in the total. If **Grading Periods** exist, limit the columns included in the total by choosing **All Grade Columns in Grading Period**. To include specific columns or categories in the total, choose **Selected Columns and Categories**.
