Group Views for Instructors

When an Instructor opens a course in Blackboard and navigates to the Groups page, three links appear in the top-right corner.

- Click **All Groups** to display the complete list of groups in the course.
- Click **Group Sets** to display a table of Group Sets, detailing the number of groups in each set, enrollment status, and availability. From this page you can also create new Group Sets by pointing to the **Create** button and selecting the desired type of enrollment.
• Click All Users to display a list of all enrollees and the groups to which they are assigned. You can also use this page to remove group assignments from users by clicking the X in any group box. To include Teaching Assistants and Instructors, check the Show all course roles checkbox on the search bar, and click the Go button.
