

Group Settings

Group Settings is another feature available for groups where the instructor can permit students to create their own-self-enrolled groups, and also permit them to edit their student-created groups. Both are enabled by default, but an Instructor can disable them. To view and modify the settings, click the **Group Settings** button on the right end of the action bar on the Groups page.

Check or uncheck the appropriate check boxes as needed: **Permit Students to Create Single Self-Enrolled Groups** or **Permit Students to Edit Student-Created Group**. Then click **Submit** to save the changes.

STUDENT CREATED GROUPS

Permit Students to Create Single Self-Enrolled Groups
This option gives students the ability to create groups from the groups listing page. Students enroll in groups with a sign-up sheet. Instructors are able to edit all group properties and enrollments.

Permit Students to Edit Student Created Group
All students enrolled in a student created group will be able to edit the name, description, and maximum number of students able to join the group.
