Viewing Associated Content for a Rubric

A single Rubric can be associated with multiple assessments. A report listing all items associated to the Rubric is available from the Rubrics tool.

1. Under Control Panel, click **Course Tools**, then **Rubrics**.

2. Access the contextual menu next to the name of a Rubric, and click **View Associated Content**.
3. On the View All Items page, click an item name to edit the association, or click OK to return to the main Rubrics page. If an item has been used for grading, a rubric evaluation report will be available in the item’s contextual menu. This report provides statistics for an item that was graded with a rubric.
