

Changing the Availability of a Wiki

You can change the availability, access to editing, or access to commenting of one or more Wikis directly from the Wikis page.

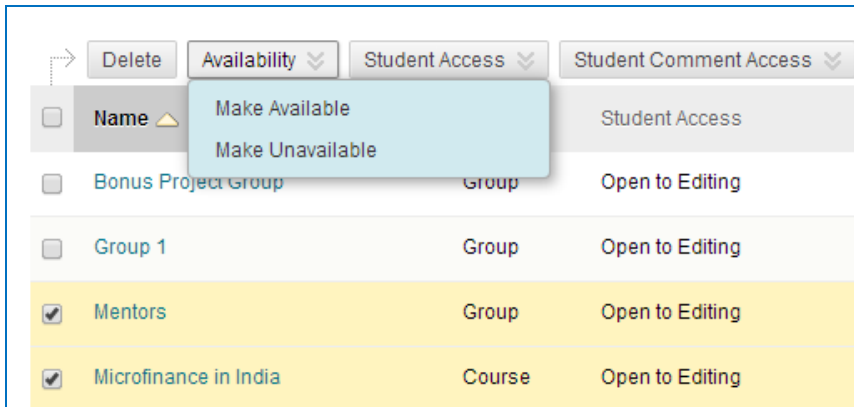

1. Log into Blackboard, and select your course.
2. On the Control Panel, click **Course Tools**, then **Wikis**.

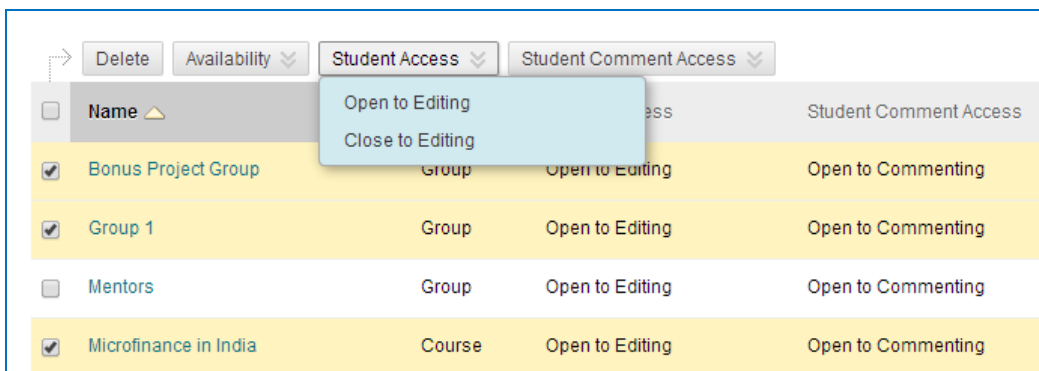

3. Make sure that Edit Mode is ON.

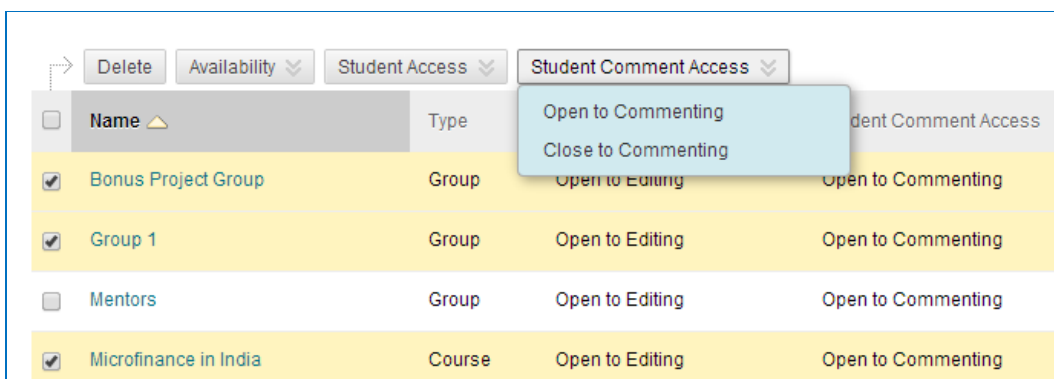

4. Click the checkbox next to each Wiki you wish to modify.
5. To change availability, point to the **Availability** button above or below the list, and select either **Make Available** or **Make Unavailable** from the menu.

- To change whether students may edit the Wiki, point to one of the **Student Access** buttons, and select either **Open to Editing** or **Closed to Editing** from the menu.

- To change whether students may comment on the Wiki, point to one of the **Student Comment Access** buttons, and select either **Open to Commenting** or **Closed to Commenting** from the menu.

When Wikis are made unavailable, the notation (**Wiki is not available**) appears below their names. The accessibility status appears in the Student Access and Student Comment Access columns of the Wikis page.
