

Creating Wiki Pages

Just as each course may have multiple Wikis, each Wiki may have multiple pages. If the Wiki allows it, students may also leave comments on Wiki pages that others have created, and even edit their content. One of the principles of the Wiki format is that its content is “self-correcting,” which actually means that users interested in the topic of the Wiki page make corrections and updates when needed.

1. Open a Wiki.

<input type="button" value="Delete"/> <input type="button" value="Availability"/> <input type="button" value="Student Access"/> <input type="button" value="Student Comment Access"/>				
<input type="checkbox"/>	Name ▲	Type	Student Access	Student Comment Access
<input type="checkbox"/>	Group 1	Group	Open to Editing	Open to Commenting
<input type="checkbox"/>	Microfinance in India	Course	Open to Editing	Open to Commenting
<input type="checkbox"/>	Training Self Enroll	Group	Open to Editing	Open to Commenting

2. If you are opening a Wiki for the first time, Blackboard will direct you to the Create Wiki Page page. Otherwise, you will see the existing page and a **Create Wiki Page** button.

3. Type a name for the Wiki page. Type the content for your wiki page in the text box under Content.

Create Wiki Page

🔗 **Instructions**
Post information about a particular aspect of microlending in India, or about the practice in a particular Indian state.

✳️ *Indicates a required field.*

WIKI PAGE CONTENT

✳️ Name

Content
Press Tab to enter the content editor. For the toolbar, press ALT+F10 (PC) or ALT+FN+F10 (Mac).

This is a link to the [Wikipedia page about Kerala](#).

4. Click **Submit**.

5. Once you click **Submit**, you will be taken to that Wiki's home page. If editing and commenting are allowed, students can click **Edit Wiki Content** to edit the current content of any page, or click **Comment** to make comments on the Wiki page. In the Wiki Details pane, click the contextual arrow next to a page title and select **History** to view the editing history of the page.
