

UNIVERSITY OF
ST. THOMAS

CERTIFICATE IN CHEMICAL DEPENDENCY COUNSELING

A CAREER WITH A PURPOSE

OFFERED 100% ONLINE

The **21-hour certificate program in Chemical Dependency Counseling** prepares graduates to serve the community as **Licensed Chemical Dependency Counselor Interns (LCDC-Interns)**. The certificate program will facilitate the growth and development of an increased number of LCDC-Interns and LCDC professionals in Texas.

These professionals will help to meet the needs of Texas communities and citizens struggling with addiction and addiction-related mental health issues. Many communities across Texas, and nationwide, continue to grapple with substance-use and related issues that significantly impact members of the community.

Graduates of the certificate program will meet the educational and practical requirements of the Texas Health and Human Services Commission, Regulatory Services Division for eligibility for LCDC-Intern licensure.
