

Disabling Grading for Forums or Threads

Even if grades exist for a forum or thread, you can disable grading for forums and threads already graded.

1. Access the Discussion Board, click a forum's contextual menu button, and select **Edit**.
2. On the Edit Forum page, in the Forum Settings section, change the grading option to **No Grading in Forum**. As you decide whether to disable grading for a forum, the number in the Points possible box appears grayed out.

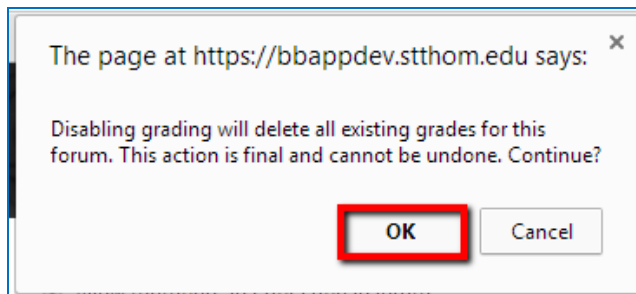

Grade

No Grading in Forum

Grade Discussion Forum: Points possible: 25

Grade Threads

3. Click **Submit**. If you already assigned grades for a forum or its threads, a warning message appears stating that disabling grading will delete all existing grades. This action is final. Click **OK** to continue, or click **Cancel** to preserve the Grade Center items.

The process is very similar for disabling grading at the thread level. On the Edit Forum page, switch from **Grade Threads** to **No Grading in Forum**, and click **OK** on the message box to confirm intent.
