Malware/Spyware Security Tips

MALWARE

Protect Yourself from Unwanted Programs on your computer

- Install and use anti-virus & anti-spyware programs
- Be cautious of large e-mail attachments
- Be cautious when downloading software from Web sites
- Configure your Internet browser to be secure
- Don't click on pop-up advertisements
- Read your license agreements before installing software
- Be aware of free downloadable software
- Be aware of e-mail links claiming to offer anti-spyware software
